

NuWave | LightWave Server™

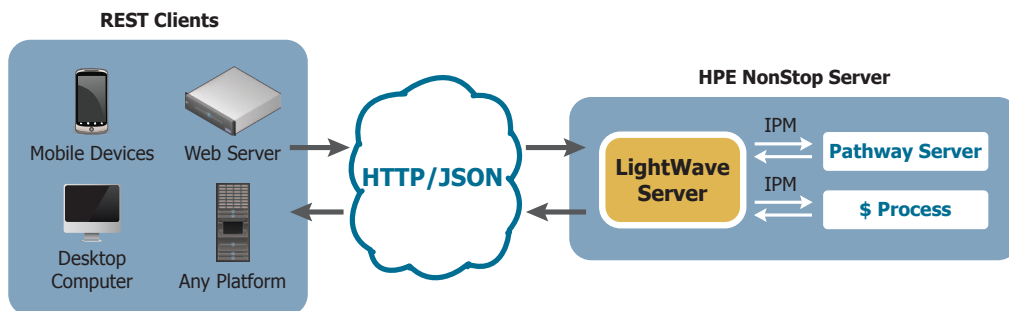

LightWave Server allows applications running on virtually any platform to securely access NonStop applications through a standard REST Web service interface.

Potential Uses

- ▶ Provide services that allow customers and business partners to place orders, check inventory, make payments, etc.
- ▶ Create dashboards to display NonStop application status
- ▶ Integrate NonStop-based applications with other enterprise applications
- ▶ Develop mobile or web applications that utilize information stored on your NonStop

Benefits

- ▶ Respond faster to changing business demands
- ▶ Integrate with third-party applications
- ▶ Leverage existing NonStop applications

Why Choose LightWave Server?

- ▶ High Quality
- ▶ Low Total Cost of Ownership (TCO)
- ▶ Support from Middleware Experts

Get up and running in 30 minutes with our free trial!
